Subject:	Fwd: TIMELY: Question about USAID PREDICT Health Map link: Re: Triangulated Surveillance, FrontLines Story

Dear Jonna, Peter, and John,

Could you please advise for a better link to Health Map? Please see below the request from Richard, Regional Development Outreach Communication Specialist.

Richard 's email to Andrew:

"http://data.predict.global/QfZfZ/NKUZZ/ZojTZ/
It's a bit strange -- the link takes you to a broken link page, and then when you click on "Health Map" you get the map, but not a new URL/Link. Can we get a direct link to the Health Map without going through this broken link page?
Could you quickly check with the USAID PREDICT team about that? The map is great, but it looks odd if we have to route people through a broken link page to get there. I need to finalize this draft by Tuesday, so grateful for your quick help on this"

Thank you very much for your help regarding the tight timeline that we have.

Best regards,
Sudarat

Subject: TIMELY: Question about USAID PREDICT Health Map link: Re: Triangulated Surveillance, FrontLines Story

Hi Dan and K Koong,

Andrew's out-of-office is on for next week. If you know of someone at USAID PREDICT who could answer this question, would be grateful if we could forward it directly. Under a tight deadline to get a better link to the Health Map. So please go ahead and forward or let me know who could answer and I'll forward.

Thanks,

Richard

Hi Andrew,

The draft story is nearly completed, and the editor asked about this link to the USAID PREDICT Health Map:

http://data.predict.global/QfZfZ/NKUZZ/ZojTZ/

It's a bit strange -- the link takes you to a broken link page, and then when you click on "Health Map" you get the map, but not a new URL/Link. Can we get a direct link to the Health Map without going through this broken link page?
